

LEAD MAGNET

The AI Research Workflow

A 5-step system for turning the week's AI noise into notes you actually use — with prompts you can copy today.

PART 1

Why most AI reading goes nowhere

You read dozens of posts a week. By Friday, you remember three. The problem isn't input — it's the lack of a capture-and-compress loop.

40+

AI posts skimmed per week

~7%

recalled a week later

15 min

daily for this system

This guide gives you a lightweight workflow: **collect** with intent, **compress** with an LLM, and **connect** new ideas to what you already know.

QUICK WIN

Before anything else, create a single inbox note. Every link goes there — no sorting at capture time.

What you'll build

- A daily 10-minute triage habit
- A reusable summarisation prompt
- A weekly synthesis note that compounds over time

PART 2

The 5-step workflow

1

Capture

Send every interesting link to one inbox. Don't read yet.

2

Triage

Once a day, keep only items that change how you work or think.

3

Compress

Run the summary prompt below on each keeper.

4

Connect

Link each summary to one existing note or project.

5

Synthesise

Every Friday, write five bullets: what changed this week.

PROMPT · COMPRESS

Summarise this article in 3 bullets for a practitioner.
Then answer: "What would I do differently tomorrow?"
Finally, list 1 claim I should verify.

```
<article>
{{paste text}}
</article>
```

WATCH OUT

LLM summaries flatten nuance. For anything you'll act on, read the original section the summary points to.

CHECKLIST

Your weekly checklist

Print this or pin it. Tick through it every Friday.

- ☐ **Inbox emptied**
Every captured link triaged: kept or deleted.

- ☐ **Keepers compressed**
Summary prompt run on each keeper.

- ☐ **One connection per note**
Linked to a project or existing note.

- ☐ **Weekly synthesis written**
Five bullets on what changed.

- ☐ **One experiment picked**
Something to try next week.

KEEP GOING

Get the signal, skip the noise.

Every week, Signal Weekly sends the 5 AI developments that actually matter — already compressed, with what to do about them.
